CAREER OBJECTIVE

Recent Software Engineering graduate with a background in web development, data analytics, and cloud technologies. Seeking to join an Internship Program to contribute to live projects, gain cross-departmental exposure, and grow into a well-rounded professional through hands-on work and mentorship.

EDUCATION

Daffodil International University <i>Bachelor of Science in Software Engineering</i> – CGPA: 3.9/4.00 – Relevant Coursework: Data Structure, Algorithms Design, Object Oriented Design, Web Application, Database System, Software Architecture, Software Quality Assurance & Testing, Networking, AI, Machine Learning.	Dhaka, Bangladesh Graduated August 2026
Kumudini Govt College <i>Higher Secondary School Certificate (GPA: 5.00/5.00)</i>	2021
Sristy Academic School <i>Secondary School Certificate (GPA: 5.00/5.00)</i>	2019

TECHNICAL SKILLS

Languages: Python, R, SQL, C, C++, Java, JavaScript, HTML, CSS
Data Science & ML: TensorFlow, Keras, Orange ML, Google Colab
Analytics & Visualization: PowerBI, Looker Studio
Web Frameworks & Tools: Spring Boot, ReactJS, Django, Docker, Bootstrap

CERTIFICATIONS

AWS Academy Graduate - Machine Learning Foundations <i>Amazon Web Services</i> – Earned Training Badge demonstrating proficiency in machine learning concepts and AWS cloud foundations.	Aug 2025
--	----------

PROJECTS

Daycare Connect <i>React.js, Django, PostgreSQL, Docker</i> – Developed a web platform connecting parents with verified daycare centers, enabling features like pickup scheduling, SOS alerts, and booking management. – Implemented secure authentication using JWT and role-based access for parents and daycare providers. – Utilized Docker for containerization and ensured code quality using SonarCloud and Snyk security scanning.
CleanIt <i>Java Spring Boot, MySQL, HTML, CSS</i> – Developed a web application offering cleaning services, leveraging APIs for smooth integration. – Designed the frontend with HTML, CSS, and Bootstrap to provide a user-friendly interface for booking and managing cleaning appointments.
Airplane Management System <i>Java Swing, MySQL</i> – Created a management system to efficiently manage flight schedules, bookings, and passenger information. – Implemented a user-friendly interface using Java Swing for seamless operations.
Human Following Robot <i>Sensors, Bluetooth</i> – Developed a robot equipped with sensors to accurately track and follow human movement. – Utilized Bluetooth technology to transmit collected data, enabling real-time monitoring and analysis.

SOFT SKILLS

Interpersonal: Communication, Teamwork, Leadership, Adaptability
Operational: Problem Solving, Time Management
